# FEATURES

CALIBRE NUMBER
Term, similar to a type or model, that refers to the specific name of a watch movement.

5-YEAR INTERNATIONAL WARRANTY
Our quest for excellence has allowed us to extend the international warranty to 5 years, on all of our new timepieces purchased as of July 1st 2018. Note: Please refer to the Warranty chapter for specific information about the warranty conditions and restrictions or if you purchased your watch before July 1st 2018.

CHRONOMETER
Label given to a watch which has undergone and successfully passed stringent precision tests in order to receive a certificate compliant with the chronometer ISO 3159 standard.

SELF-WINDING
A mechanical watch movement whose mainspring is wound automatically by the natural motion of the wearer's arm.

CO-AXIAL ESCAPEMENT
The Co-Axial escapement reduces friction and the need for lubrication. It maintains accuracy over a longer period of time and prolongs service intervals compared to traditional Swiss lever escapement.

SI14 SILICON BALANCE-SPRING
Non-magnetic and highly resilient balance spring made of silicon by means of photolithography and plasma etching. Concentric expansions and contractions of this balance spring result in even oscillations of the balance wheel providing stable chronometric performance.

CHRONOGRAPH
The chronograph or chronoscope is a mechanism that can be actuated by pushers, making it possible to measure a time between two events and to indicate it through hands.

DATE
An additional function that indicates the date through a disc or hand.

WATER-RESISTANT TO A RELATIVE PRESSURE OF 10 BAR
Water-resistant watch to a relative pressure of 10 bar corresponding to a depth of 100 meters / 330 feet.

SAPPHIRE CRYSTAL
Very hard and highly transparent material that offers extreme scratch-resistance.

ANTI-REFLECTIVE TREATMENT ON BOTH SIDES
Sapphire crystal coated on both sides with a layer minimizing light reflection on the crystal and therefore ensuring optimal readability.

WATCH WITH PRECIOUS STONES
The weight of diamonds and other precious stones (emerald, ruby, sapphire) is indicated in carats while 1 carat equals 0.2 grams.

| | GEM | QTY | COLOUR | CLARITY | CARAT | CUT | DIAMETER |
|---|---|---|---|---|---|---|---|
| Bezel | Diamond | 52 | TW(G) | IF-VVS | 1.53 | 32 / 24 | 2 |

*The diamonds and other precious stones contained in this product have been purchased from legitimate sources not involved in funding conflict and in compliance with United Nations resolutions. Applying the OECD's five-step due diligence framework, OMEGA ensures that all of its partners are responsible and respectful of human rights, with the guarantee that diamonds, other precious stones and precious metals, are never sourced from conflict or high-risk areas.*

# RECOMMENDATIONS

HOW TO CARE FOR YOUR WATCH

### WATER RESISTANCE

A watch cannot be guaranteed fully waterproof at all times. It may be affected by the gaskets ageing or an accidental shock to the crown. We recommend that you have the water resistance of your watch tested once a year by an authorised OMEGA service centre.

### CROWN

After each time the crown is used, push it to position 1 to ensure the watch remains watertight. The crown should never be handled in water.

### CHRONOGRAPH PUSHERS

To avoid letting water enter the mechanism, do not handle the chronograph pushers in water.
Exceptions are the Seamaster Diver 300M and Planet Ocean 600M chronograph models, which have pushers that function in the water.

### SWIMMING IN THE SEA

Always rinse your watch in fresh water after swimming.

### SHOCKS

Avoid exposing your watch to mechanical, thermal and other types of shock.

### TEMPERATURES

Avoid exposing your watch to extreme temperatures (higher than 60°C or 140°F and lower than 0°C or 32°F) or extreme variations in temperature.

### CHEMICALS

Avoid direct contact with solvents, detergents, perfumes, cosmetics, mosquito repellents, etc. as these may damage the bracelet, case or gaskets.

### MAGNETIC FIELDS

Avoid placing your watch on a magnet, speaker, refrigerator, laptop, iPad case or other tablet, as these generate powerful magnetic fields that can disrupt the operation of your timepiece.

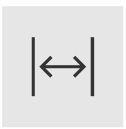

### ADJUSTING THE STRAP LENGTH

You can visit an OMEGA point of sale or authorised service centre to have your strap adjusted to the correct length. Specialists will measure the circumference of your wrist and advise you on how to ensure your watch is as comfortable as possible.

### CLEANING

For metal bracelets, rubber straps and waterproof cases, use soapy water and a toothbrush for cleaning and a soft cloth for drying.

### HOW LONG IS THE PERIOD BETWEEN EACH SERVICE?

As with any precision instrument, a watch requires regular servicing to ensure that it functions perfectly. We cannot recommend the frequency of servicing since it depends entirely on the model, the climate and the care that each owner gives their watch. As a general rule, watches should be serviced every 5 to 8 years depending on the conditions in which they are used.

### WHO SHOULD I CONTACT FOR ANY MAINTENANCE?

We recommend that you contact an authorised OMEGA service centre or OMEGA boutique. They have the tools and equipment required to carry out this work and the necessary checks in a professional manner. In addition, these specialists can guarantee that their work will comply with the strict quality standards applied and imposed by OMEGA.
